1. Introduction

A. Overview
Fortigate SSL VPN is a tool which provides a secure connection to Speridian Trivandrum network from outer networks.

B. Disclaimer
The FortiClient VPN software and passwords are to be used by authorized personal only. Any unauthorized access caused by the passing of the passwords and software to any Speridian or external user will lead to disciplinary action. Speridian ITS team has all the rights to disable this account:

- If the user is accessing VPN from personal machines/laptops without permission
- If the user machine is unprotected from antivirus /anti malware
- If the user is trying to access unauthorized resources

C. VPN Request Form
A user has to request for the VPN connection to the ITS team by submitting a form.
And the form should have all the required information, along with the manager's approval.
The ITS team will verify the request and provide access. Then the user can access it by entering speridian internal apps credentials (E.g. Mirror/O360.speridian.com)

2. Installation and Configuration
