

How to Manually Archive emails from outlook and add the archived file to outlook.

About archives

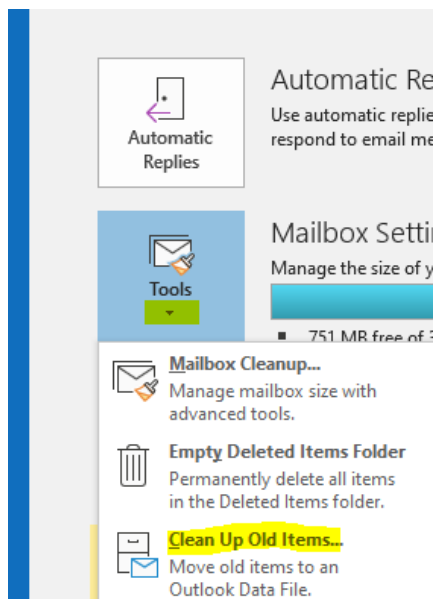

Archived items are moved to a separate Outlook Data File (.pst). This means archived items are no longer stored on the server and can only be accessed by opening the Outlook Data File on a computer with Outlook installed. Archives CANNOT be opened on mobile devices such as iPads, iPhones & Android devices or through webmail (Outlook Web App).

Manually Archive E-mail in Outlook

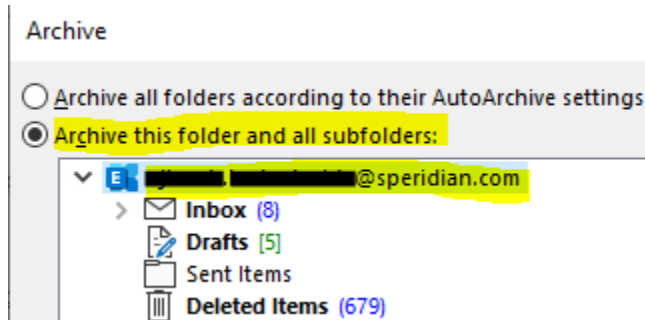

1. Click the File tab

2. Click on **down arrow** under Tools and click **Clean Up Old Items**.

- Click the **Archive this folder and all subfolders** option, and then select Mailbox (**User's email address**) to archive ALL Outlook items.

- Under **Archive items older than**, enter a date to archive the emails till that specific date.

- Check the box **Include items with "Do not AutoArchive" checked** to include any items that might be individually marked to be excluded from automatic archiving.

- If you do not want to use the default file or location, under **Archive file**, click **Browse** to specify a new file or location. Enter the name for your archive, then click **OK**. The destination file location appears in the Archive file box.

- Click  to save your Archive.

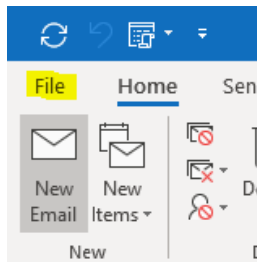

NOTE: New archives created with Microsoft Outlook are saved in the following locations by default: C:\Users\username\Documents\Outlook Files.

8. Once you click  archiving will be started and progress can be seen as below in the below tab in outlook.

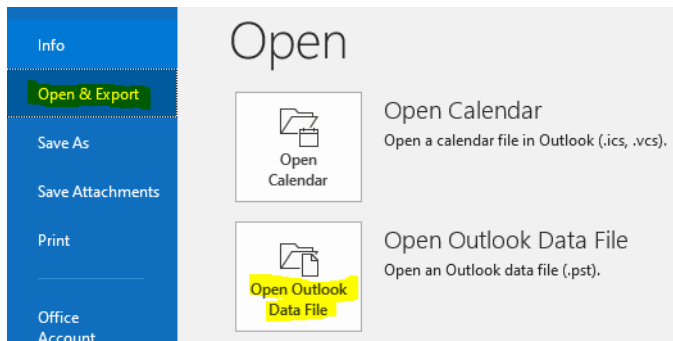

How to add Archive file (.PST file) in outlook to view the old emails

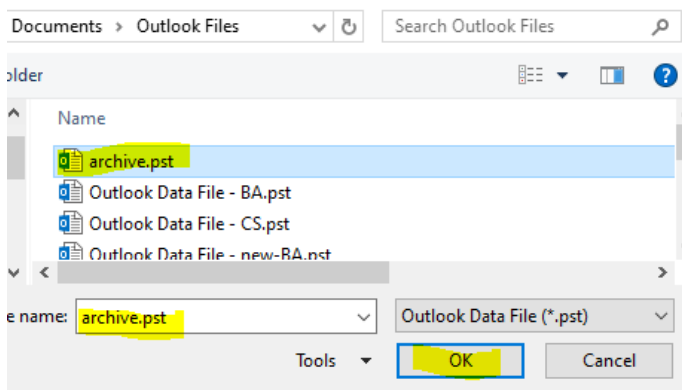

1. Click the **File** tab.

2. Click **Open & Export** and Choose **Open Outlook Data File**.

3. Navigate to your Outlook Data File (.pst) and Select. Click **OK**.

4. The name of the archive will appear under the Mail or Folder List in the Navigation Pane as shown below.
